In this case a short description of the Element is included in the summary with the mention of “non applicable”.

B.3 Current Operations/Principal Activities and Markets

Introduction

The Company has been formed for the purpose of acquiring a target company or business or asset(s) with operations in the energy or industrial sectors. The Company does not have any specific acquisition under consideration at present and does not expect to engage in substantive negotiations with any target company or business until after Admission.

In the highly likely event that, on completion of an Acquisition, the Acquisition is treated as a Reverse Takeover, an application will be required for the Company's shares to be re-admitted to the Official List and trading on the Main Market of the London Stock Exchange or admission to another stock exchange.

The Company's determinations in identifying a prospective target company or acquisition in the energy or industrial sectors will not be limited to a specific geographical region, stage of development from exploration through to production or to a particular commodity.

The Board may consider acquisitions that do not conform with the above criteria.

Whereas size on its own is not a selection criterion, the Board will focus its efforts on businesses valued between £5m and £30m.

It is likely that the initial target will be a business domiciled in Europe or another OECD market but the business and/or its assets may be in another part of the world.

SECTION D – RISKS

D.1 Key Information on the Key Risks that are Specific to the Issuer or its Industry

Business Strategy Risks

No operating history

The Company was incorporated on 17 November 2016 and has no operating or management history and no revenues.

The Company may not be able to find a suitable Acquisition. Completed Acquisitions might not be able produce positive returns for Shareholders

The Company's business strategy is to identify, evaluate and complete suitable Acquisition opportunities in the energy and industrial sectors. No guarantee can be made by the Directors that such an Acquisition will be made.

Overall, the Company's returns could be significantly lower should there be a delay in identifying a suitable Acquisition

The Directors can give no assurance as to the time it will take to complete any Acquisition, if at all, and no Acquisition will be planned and executed until after Admission. Following Admission suitable Acquisition opportunities may not be immediately available.

Shareholder Approval may not be sought for Acquisitions or other transactions

Unless required to do so by any applicable regulation or law the Board will not in the normal course seek Shareholder Approval for an Acquisition or transaction unless the Board deem it reasonable in any particular circumstance to do so.

Reliance on external advisers

The Directors may expect to rely on external advisers to help identify and assess potential Acquisitions and there is a risk that suitable advisers cannot be placed under contract or that such advisers that are contracted fail to perform as required.

Failure to obtain additional financing to complete an Acquisition

There is no guarantee that the Company will be able to obtain any additional financing needed to implement its business funding plans following an Acquisition or, if available, to obtain such financing on terms attractive to the Company.

Due diligence efforts made by the Company while making an Acquisition may not identify all the relevant liabilities of a target which could have a substantial adverse effect on the financial position of the Company and its operations

The Directors intend to adopt relevant due diligence prior to any Acquisition. The primary objective of the due diligence is to identify any quantifiable issues which might affect the decision to proceed with an Acquisition but it may not do so.

Global supply and demand changes due to a potential economic downturn may adversely affect the business, cash flows, results of operations and financial conditions of the Company, following an Acquisition.

Global supply and demand affects commodity prices. Widespread trading activities by market participants seeking either to secure access to commodities or to hedge against commercial risks affects commodity prices as well which may impact the Company.

Currency exchange rate fluctuations may negatively affect the Company

The Placing and Subscription will raise proceeds denominated in British Pounds sterling. However, the markets for many commodities are often listed in US dollars.

The Company's cash flows and results of operations may be adversely affected by inflation and other cost increases

The Company will be unable to control the market prices of any commodities produced in its operations following an Acquisition.

Safety, health and environmental exposures and related regulations may expose the Company to increased litigation, compliance costs, and interruptions to operations, unforeseen environmental remediation expenses and loss of reputation.

The energy and industrial sectors involve extractive and manufacturing enterprises. These endeavours often make the sectors potentially hazardous. The sectors are typically highly regulated by health, safety and environmental laws.

D.3 Key Information on the Key Risks that are Specific to the Securities

No Share Price Trading History

On Admission, there is no certainty that the Ordinary Shares will be valued at the Issue Price and so it is possible that the price of the Ordinary Shares may fall on that date or on later dates.

Small Company and Financial Risk

The Company will receive Net Proceeds of £1.07m and have an estimated market capitalisation of £1.3m and so will be one of the smallest companies listed on the London Stock Exchange. Following the Placing and Subscription, the Company will have limited cash resources of £1.1m and will only have a small income from bank deposits estimated to be £3,000 per annum.

Risk of Suspension

Should a Reverse Takeover be announced by the Company or knowledge of the same leak into the market then the Company's Ordinary Shares may be suspended. During a period of suspension shareholders may be unable to realise the value from their shares. Should the shares remain suspended of a prolonged period may adversely affect the value of the shares.

The proposed Standard Listing of the Ordinary Shares will afford investors a lower level of regulatory protection than a Premium Listing.

Application will be made for Ordinary Shares to be admitted to the Standard Listing segment of the Official List. A Standard Listing will afford investors in the Company a lower level of regulatory protection than that afforded to investors in a company with Premium Listing, which is subject to additional obligations under the Listing Rules.

The pre-emption rights in the Articles of the Company have been disapplied to permit the Company to issue equity securities up to a nominal amount of £5,000,000 in order to facilitate an Acquisition and related transactions and the Company may be required to raise cash through issuing substantial additional equity to complete an Acquisition, which may dilute the percentage ownership of a Shareholder and the value of its Ordinary Shares

Although the Company will receive the Net Proceeds from the Placing and Subscription, the Directors believe that further equity capital raisings may be required by the Company in order to complete an Acquisition, which may be substantial. The pre-emption rights contained in the Articles have been disapplied for Shareholders in respect of the issuance of Ordinary Shares for non-cash consideration and for the issue of equity securities up to a nominal amount of £5,000,000, to facilitate an Acquisition and would dilute the value of the Ordinary Shares held by existing Shareholders, Potential Placees and Subscribers.

Investors may not be able to realise returns on their investment in Ordinary Shares within a period that they would consider to be reasonable.

Investments in Ordinary Shares may be relatively illiquid. There may be a limited number of Shareholders and this factor, together with the number of Ordinary Shares to be issued pursuant to the Placing and Subscription may contribute to infrequent trading in the Ordinary Shares on the London Stock Exchange and volatility in the price of the Ordinary Shares.

SECTION E – OFFER

E.1 Total Net Proceeds/Expenses

The Company has conditionally raised gross proceeds of £1.2m through the issue of the Founder Shares, the Placing and Subscription Shares, the estimated net proceeds of which are approximately £1.07m.

The total expenses incurred or payable by the Company in connection with Admission are approximately £130,000 (inclusive of VAT).

E.2a Reasons for the Placing and Subscription and Use of Proceeds

The Company has been formed to attempt an acquisition of a target company (or companies), businesses or asset(s) in the energy and/or industrial sectors. The Company has not defined a target value, but the Board will focus its efforts on businesses with a value in the range of £5m to £30m. Following completion of an Acquisition, the objective of the Company is to develop the acquired business with a view to generating value for the Company's shareholders.

Prior to completing an Acquisition, the Net Proceeds of the Placing and Subscription will be held in an interest bearing account and will be used for general business purposes, including paying the expenses of Admission and the Company's ongoing costs and expenses, including due diligence costs and other costs of sourcing, reviewing and pursuing Acquisitions.

The Directors have agreed that in order to preserve the Company's capital, no fees will be payable to them for their ordinary duties prior to completing an Acquisition. Directors will be permitted to claim reimbursement from the Company for reasonable expenses incurred in connection with the business and the Board may use its discretion to make a payment to a Director in the event that s/he performs duties that are extraordinary, for example if significant time is spent in the completion of due diligence thereby saving professional fees that might otherwise be incurred.

The Company intends to use the Net Proceeds to finance due diligence on potential acquisitions and for general working capital. It is intended that the initial Acquisition will be paid for using new Ordinary Shares either solely or in conjunction with cash, should the Board consider it appropriate. Permission for any Acquisition shall not be sought from Shareholders unless required by any applicable regulation or law unless the Board deem it reasonable to do so in any particular circumstance.

The Board considers that the Net Proceeds should be sufficient to cover both the expenses and any other costs associated with an Acquisition. Consideration for an Acquisition is likely to be funded through the issue of shares to raise cash and directly to the vendors of a target business.

In the highly likely event that, on completion of an Acquisition, the Acquisition is treated as a Reverse Takeover the Company will be required to seek re-admission of the Company's shares to listing on the Official List and trading on the London Stock Exchange, or to another appropriate stock exchange.

E.3 Terms and Conditions of the Placing and Subscription

The Founder Shares were issued and allotted to Mr Andrew Morrison, Anthony Harpur and Richard Liddell at a price of 2.5 pence per Ordinary Share and are currently held by the Founders as set out in Part VI. Pursuant to the Placing and Subscription, Ordinary Shares will be offered to investors at 5 pence per share, conditional upon Admission occurring and becoming effective by 8:00a.m. London time on or prior to 17 May 2017 (or such later date as the Company and SP Angel may agree but by no later than 7 June 2017). The rights attaching to the Ordinary Shares will be uniform in all respects and all of the Ordinary Shares will form a single class for all purposes.

E.4 Material Interests

Not applicable; there are no interests, including conflicting interests, known to the Company, material to Admission.

E.5 Selling Shareholders/Lock-up Arrangements

Not applicable; no person or entity is offering to sell the relevant securities.

Each of the Founders has agreed that he shall not, without the prior written consent of the Company and SP Angel, offer, sell, contract to sell, pledge or otherwise dispose of any Ordinary Shares which they hold directly or indirectly in the Company for a period of six months commencing on the date of Admission.

The restrictions on the ability of the Founder Shareholders to transfer their Ordinary Shares are subject to certain usual and customary exceptions and exceptions for: transfers for estate planning purposes; death; transfers to Directors and Founder Shareholders' ISA Accounts; transfers to family trusts; or otherwise with the consent of the Company and SP Angel.

E.6 Dilution

Shareholdings immediately prior to Admission will be diluted by 1,200 per cent as a result of the New Ordinary Shares issued pursuant to the Placing and Subscription.

Furthermore, the number of Warrants, Broker Warrants and Options in issue at Admission will be as follows:

Warrant/Option Type	Number of Warrants	Percentage of Enlarged Capital	Exercise Price	Exercise Period
Warrants	24,000,000	92.3%	7.5 pence	Three years from Admission
Broker Warrants	790,500	3.0%	5 pence	Three years from Admission
Options	2,600,000	10.0%	5 pence	Three years from Admission
Total				

Should Warrant Holders choose not to execute their Warrants, then they would likely face dilution in that their percentage ownership of the Company would fall if other Warrant Holders choose to exercise their Warrants.

A summary of the main terms and conditions of the Warrants and Broker Warrants is set out in Part V of this document. The Warrants and Broker Warrants will not be admitted to trading on the Official List but shall be freely transferable.

Each Warrant will entitle a Warrant Holder to subscribe for one Ordinary Share of 2.5 pence each at a Subscription Price of 7.5 pence each per Warrant Share. Each Broker Warrant will entitle a Broker Warrant Holder to subscribe for one Ordinary Share of 2.5 pence each at a Subscription Price of 5 pence each per Broker Warrant Share.

Warrant Holders and Broker Warrant Holders must exercise any Subscription Rights within a 3 year period from Admission.

Warrants and Broker Warrants may be transferred by means of an instrument of transfer in any usual form or any other form approved by the Board.

Should Option Holders choose not to exercise their Options, then they would likely face dilution in that their percentage ownership of the Company would fall if other Option Holders choose to exercise their Options.

If an Acquisition is wholly or partly financed with additional Ordinary Shares, existing Shareholders may be diluted.

E.7 Expenses Charged to Investors

Not applicable; no expenses will be charged to investors.

RISK FACTORS

Investment in the Company and the Ordinary Shares carries a significant degree of risk, including risks in relation to the Company's business strategy, risks relating to the energy and industry sectors, risks relating to the Company's relationship with the Directors and potential conflicts of interest, risks relating to taxation and risks relating to the Ordinary Shares.

The risks referred to below are the material risks relating to the Company. However, there may be additional risks that the Company and the Directors do not currently consider to be material or of which the Company and the Directors are not currently aware that may adversely affect the Company's business, financial conditions and results of operating.

Prospective investors should review this Document carefully and in its entirety and consult with their professional advisers before acquiring any Ordinary Shares. If any of the risks referred to in this Document were to occur, the results of operations, financial condition and prospects of the Company could be materially adversely affected. If that were to be the case, the trading price of the Ordinary Shares, the target rate of return, and/or the level of dividends (if any) received from the Ordinary Shares could decline significantly. Furthermore, Investors could lose all or part of their investment.

Business Strategy Risks

No operating history

The Company was incorporated on 17 November 2016 and has no operating or management history and no revenues. Since the Company has yet to commence operations, prospective investors are reliant on the abilities of its Directors to identify and evaluate suitable acquisition targets on behalf of the Company.

As of the date of this Prospectus, the Company has not identified any targets or Acquisitions and will only attempt to do so from the date of Admission. The Company will not be able to generate significant revenues until after an Acquisition is made.

The Company may not be able to find a suitable Acquisition. Completed Acquisitions might not be able produce positive returns for Shareholders

The Company's business strategy is to identify, evaluate and complete suitable Acquisition opportunities in the energy and industrial sectors. No guarantee can be made by the Directors that such an Acquisition will be made. Should a suitable Acquisition be identified and evaluated no guarantee can be made that Company will complete the Acquisition. Furthermore, no assurance can be given that once an Acquisition is made that Acquisition will produce positive returns for Shareholders. Should the Company, for whatever reason, fail to attain a targeted Acquisition then the Company may well be left with substantial unrecoverable transaction costs.

Overall, the Company's returns could be significantly lower should there be a delay in identifying a suitable Acquisition

The Directors can give no assurance as to the time it will take to complete any Acquisition, if at all, and no Acquisition will be planned and executed until after Admission. Following Admission suitable Acquisition opportunities may not be immediately available. Whilst interest rates remain historically low rate, returns from the Company's bank deposits will be correspondingly poor. Thus it is to be expected that operating expenses will exceed interest returns by a substantial margin. As a result of the Company may be in a weaker position to make Acquisitions as cash balances fall over time.

Risks inherent in an Acquisition

Although the Company and the Directors will evaluate the risks inherent in a particular target, they cannot offer any assurance that all of the significant risk factors can be identified or properly assessed. Furthermore, no assurance can be made that an investment in Ordinary Shares in the Company will ultimately prove to be more favourable to investors than a direct investment, if such opportunity were available, in a target business.

Shareholder Approval may not be sought for Acquisitions or other transactions

Unless required to do so by any applicable regulation or law the Board will not in the normal course seek Shareholder Approval for an Acquisition or transaction unless the Board deem it reasonable in any particular circumstance to do so.

Small Company and Financial Risk

The Company will receive Net Proceeds of £1.07m and have a market capitalisation at the Issue Price of £1.3m and so will be a very small company, compared with other companies listed on the London Stock Exchange. Following the Placing and Subscription, the Company will have cash resources of £1.1m and income from bank deposits estimated to be £3,000 per annum.

If the Company attempts to make an Acquisition and undertakes a due diligence programme, then it is possible that the Company's cash balances may become severely depleted by the cost of the due diligence work. There can be no certainty that the Company can replenish its cash resources in the event that due diligence work is undertaken but the Acquisition does not proceed and if this proves to be the case then the price of the Company's shares may fall.

The Company intends to maintain a minimum cash balance of at least £250,000. The Directors have estimated the Company's fixed overheads to be £100,000 per annum, and so this equates to two years' running costs. In the event that the Company's cash balances were severely depleted, the Directors would consider raising additional finance or, if this were not possible, seek to return the remaining cash to Shareholders. The Company will though be able to finance any due diligence and Acquisition costs or any other costs the Company may incur for at least a period of 12 months from Admission.

Reliance on external advisers

The Directors may expect to rely on external advisers to help identify and assess potential Acquisitions and there is a risk that suitable advisers cannot be placed under contract or that such advisers that are contracted fail to perform as required.

Failure to obtain additional financing to complete an Acquisition

There is no guarantee that the Company will be able to obtain any additional financing needed to implement its business funding plans post Acquisition or, if available, to obtain such financing on terms attractive to the Company. In that event, the Company may be compelled either to restructure or abandon the Acquisition or proceed with the Acquisition on less favourable terms, which may reduce the Company's return on the investment. The failure to secure additional financing on acceptable terms could have a material adverse effect on the continued development and growth of the Company and the acquired business.

Restrictions in offering Ordinary Shares as consideration for an Acquisition or requirements to provide alternative consideration

In certain jurisdictions, there may be legal, regulatory or practical restrictions on the Company using its Ordinary Shares as consideration for an Acquisition or which may mean that the Company is required to provide alternative forms of consideration. Such restrictions may limit

the Company's acquisition opportunities or make a certain acquisition more costly, which may have an adverse effect on the results of operations of the Company.

Competition for Acquisitions

Although the Directors believe that the current economic environment has created potential opportunities for the Company, there may be competition from others seeking the same or similar opportunities. Competitors might include other energy and industrial companies, existing shareholder groups and investment funds. Although the Company, through its Directors and potentially supported by the Retained Advisers, have excellent contacts in the energy and industrial sectors no assurance can be given the Company will be successful against such opposition.

Due diligence efforts made by the Company while making an Acquisition may not identify with all the relevant liabilities of a target which could have a substantial adverse effect on the financial position of the Company and its operations

The Directors intend to adopt relevant due diligence prior to any Acquisition. The primary objective of the due diligence is to identify any quantifiable issues which might affect the decision to proceed with an Acquisition.

During the due diligence process the Company will also make subjective conclusions on the viability of the business and rely on information provided by the relevant acquisition target and third party investigations. No assurance can be given that the information provided during the due diligence process will be adequate or accurate. If the due diligence investigation fails to correctly identify the negative issues with the target and the acquisition completes then the Company may incur substantial impairments or losses.

Risks Relating to the Energy and Industrial Sectors

Global supply and demand changes due to a potential economic downturn may adversely affect the business, cash flows, results of operations and financial conditions of the Company, following an Acquisition.

Global supply and demand affects commodity prices. Widespread trading activities by market participants seeking either to secure access to commodities or to hedge against commercial risks affects commodity prices as well. Changes in commodity prices could give rise to commodity price risk for the Company as a supplier of and/or user of commodities as raw material. Commodity prices are subject to substantial fluctuations and cannot be accurately predicted.

In the event of a substantial global economic downturn, and if that downturn depresses the economy for the medium to long term, the Company's ability to grow or sustain revenues in the future years may be adversely affected, and with respect to certain long term price levels for a given commodity, operations may not remain economically feasible.

Disadvantageous economic conditions may limit the Company's ability to predict revenues and costs which may affect the Company's capability to conduct planned projects anticipated following the Acquisition.

Currency exchange rate fluctuations may negatively affect the Company

The Placing and Subscription will raise proceeds denominated in British Pounds sterling. However, the markets for many commodities and other raw materials are often listed in US dollars. The Company does not intend to hedge the Net Proceeds against risks associated with disadvantageous movements in the currency exchange rates. Therefore, currency exchange rate fluctuations may negatively affect the Company.

The Company's cash flows and results of operations may be adversely affected by inflation and other cost increases

The Company will be unable to control the market prices of any commodities used or produced in its operations following an Acquisition. The Company may be unable to pass increased production costs to customers. Therefore, significant inflation or other production cost increases in the countries in which the Company may operate could increase operational costs without a corresponding increase in the sales revenues the Company may generate. Moreover, an interruption in the reduction of input costs relative to decreasing sales revenues will have a similar negative impact on the Company's operations. Any such elevated costs or postponements in cost reductions may negatively affect the Company's profitability, cash flows and results of operations.

Safety, health and environmental exposures and related regulations may expose the Company to increased litigation, compliance costs, and interruptions to operations, unforeseen environmental remediation expenses and loss of reputation.

The energy and industrial sectors involve extractive and/or manufacturing enterprises. These endeavours often make the sectors potentially hazardous. The sectors are typically highly regulated by health, safety and environmental laws. The Company's operations following an Acquisition may be subject to these kinds of governmental regulations in any region in which it operates. Operations are subject to general and specific regulations and restrictions governing exploration and production, manufacturing and processing, land tenure and use, environmental requirements (including site specific environmental licences, permits and remediation requirements), workplace health and safety, social impacts and other laws.

The Company's operations may create environmental risks including dust, noise or leakage of polluting substances from its operations. Failing to adequately manage environmental risks or to provide safe working environments could cause harm to the Company's employees or the environment surrounding the operations site. Facilities are subject to closure by governmental authorities and the Company may be subject to fines and penalties, liability to employees and third parties for injury, statutory liability for environmental remediation and other financial consequences, which may be significant. The Company may also suffer impairment of reputation, industrial action or difficulty in recruiting and retaining skilled employees. Subsequent changes in regulations, laws or community expectations that govern the Company's operations could result in increased compliance and remediation costs. Any of the foregoing developments could have a materially adverse effect on the Company's results of operations, cash flows or financial condition.

Current and pending legislation and regulation concerning greenhouse gas emissions may negatively affect the Company's operations

Energy and industrial sector participants are subject to current and planned legislation concerning the emission of carbon dioxide, methane, nitrous oxide and other "greenhouse gasses".

Non-compliance with current greenhouse gas laws or any future legislation could negatively affect the Company's profitability following an Acquisition if an acquired business has material greenhouse gas intensive assets. Future legislative actions intended to diminish the use of certain commodities could also have an impact on the Company following an Acquisition. These factors could have a materially adverse effect on the Company's business, results of operations, financial condition or prospects.

The Company's assessment and estimation of the amount of reserves recoverable through an Acquisition in the energy or extractive industry sectors may be more than actually recovered.

In the event of an Acquisition in an extractive industry, the Company may estimate or hire third party experts to estimate a target's resources and reserves. These estimations are subject to a number of assumptions, including the price of commodities, production costs and recovery rates. Variations in the market underlying the Company's or third party expert's estimates and assumptions may result in material changes to its reserve estimates. Such changes may have a materially adverse impact on the financial condition and prospects of the Company after an Acquisition.

The Company's inability to discover new reserves, enhance existing reserves or adequately develop new projects through an Acquisition in an extractive industry could adversely affect the Company's business following an Acquisition.

Exploration and development work is capital intensive, speculative and often unproductive, but may be necessary for the Company's business following an Acquisition in an extractive industry. For instance, factors such as adverse weather conditions, natural disasters, equipment or services shortages, procurement delays or difficulties arising from the environmental and other conditions in the areas where the resources are located or through which production is transported may increase costs and make it uneconomical to develop potential reserves. Failure to discover new reserves, to maintain existing mineral rights, to enhance existing reserves or to extract resources from such reserves in sufficient amounts and in a timely manner could materially and adversely affect the Company's results of operations, cash flows, financial condition and prospects. In addition, the Company may not be able to recover the funds used in any exploration programme to identify new opportunities.

Increasingly stringent requirements relating to regulatory, environmental and social approvals can result in significant delays in construction of additional facilities and may adversely affect new projects, the expansion of existing operation and, consequently, the Company's results of operations, cash flows and financial condition, and such effects could be material.

The Company may be unable to acquire or renew necessary rights and concessions, licences, permits and other administrations and/or such concessions, rights, licences and permits and other authorisations may be suspended, terminated or revoked prior to their expiration

The acquired business may conduct its operations under existing rights and concessions, licences, permits and other authorisations. Any delay in obtaining or renewing a licence, permit or other authorisation may result in a delay in investment and may have a materially adverse effect on an Acquisition's results of operations, cash flows and financial condition. In addition, any existing rights and concessions, licences, permits and other authorisations of the acquired business may be suspended, terminated or revoked if it fails to comply with the relevant requirements. If, following an Acquisition, the acquired business or any of its subsidiaries fails to fulfil the specific terms of any of its rights, concessions, licences, permits and other authorisations or if it operates its business in a manner that violates applicable law, government regulators may impose fines or suspend or terminate the right, concession, licence, permit or other authorisation, any of which could have a material adverse effect on the Company's results of operations, cash flows and financial condition.

Independent contractors may delay operations

Independent contractors perform various operational tasks. At certain times, demand for independent contractors may exceed supply resulting in increased costs or lack of availability of key contractors. Interruptions in operations or higher costs can also occur as a result of disputes with contractors or shortage of contractors. Moreover, because the Company following an Acquisition will not have the same control over independent contractors as it does over employees, and there is a risk that such contractors will not operate in accordance with the Company's safety standards or other policies. Any of the foregoing conditions may have a materially adverse effect on the Company's operating results and cash flows following an Acquisition.

Natural disasters may affect operations and have a material impact on the productivity of the operations and may not be covered by insurance

Natural disasters, including earthquakes, drought, floods, fire, tropical storms and the physical effects of climate change, all of which are outside the Company's control, may adversely affect the Company's operations. Operating difficulties could affect the costs and feasibility of its operations for indeterminate periods. Damage to or breakdown of a physical asset, including as a result of fire, explosion or natural catastrophe, can result in a loss of assets and financial losses. Insurance may provide protection from some, but not all, of the costs that may arise from unforeseen events. Although the Company intends to maintain adequate insurance, the Company's insurance may not cover every possible risk connected with its operations. Adequate insurance at a reasonable cost is not always available. The Company's insurance may not cover its liability or the consequences of any business disruptions such as equipment failure or labour dispute. The occurrence of a significant adverse event not fully covered by insurance could have a material adverse effect on the Company's business, results of operations, financial condition and prospects.

The Company may be unable to access necessary infrastructure services, including transportation and utilities, which may adversely affect the Company's operations

Inadequate supply of the critical infrastructure elements for required activity could result in reduced production or sales volumes, which could have a negative effect on the Company's financial performance. Supply interruptions of essential utility services, like electricity and water, may suspend the Company's production for the duration of the disruption and, when unexpected, may cause loss of life or damage to its equipment or facilities, which may in turn affect its capacity to restart operations on a timely basis. Adequate transportation services, such as timely pipeline and port access and rail services are critical to distributing products and disruptions to such services may affect the Company's operations. The Company may be dependent on third party providers of utility and transportation services. As such, third party provision of services, maintenance of networks and expansion and contingency plans will be outside of the Company's control.

Shortages and disruptions in lead times to deliver certain key inputs may adversely affect the Company's operations

The Company's inability to acquire strategic consumables, raw materials, manufacturing and processing equipment in a timely manner could have an adverse impact on any results of operation and financial condition. Periods of high demand for supplies can arise when availability of supplies is limited. This can cause costs to increase above normal inflation rates. Interruption to supplies or increase in costs could adversely affect the operating results and cash flows of the Company following an Acquisition.

Risks Relating to the Company's Relationship with the Directors and the Founders and Conflicts of Interest

The Directors may allocate their time to other business which may lead to potential conflicts of interest in their determination as to how much time to devote to the Company's affairs, which could have a negative impact on the Company's ability to complete an Acquisition.

None of the Directors are required to commit their full time or any specified amount of time to the Company's affairs, which could create a conflict of interest when allocating their time between the Company's operations and their other commitments. However, no Director or anyone with administrative, management or senior management roles in the Company has a conflict of interest between any duties they have to the Company and their private interests other than potential conflicts of interest regarding Directors' availability to allocate their time due to directorships held with other companies.

Whilst the Company has four Directors it does not intend to have any executive officers or employees working full time prior to the completion of an Acquisition. The Directors engaged in other business endeavours are not obligated to devote any specific number of hours to the Company's affairs which could have a negative impact on the Company's ability to consummate an Acquisition.

The Directors are currently affiliated and may in the future become affiliated with, or otherwise have financial interests in, entities engaged in business activities similar to those intended to be conducted by the Company and may have conflicts of interest in allocating their time and business opportunities.

Each of the Directors has, is currently, or may in the future become affiliated with or have financial interests in entities, including certain special purpose acquisition companies, engaged in business activities similar to those intended to be conducted by the Company.

In addition, the Directors may become aware of business opportunities that may be appropriate for presentation to the Company. In some instances, they may decide or be required to present these business opportunities to other entities which they are or may be affiliated with, in addition to or instead of presenting them to the Company.

Risks Relating to Taxation

Taxation of returns from assets located outside the UK may reduce any net return to investors

To the extent that the assets, company or business which the Company acquires is or are established outside the UK, it is possible that any return the Company receives from it may be reduced by irrecoverable foreign withholding or other local taxes and this may reduce any net return derived by investors from an investment in the Company.

Changes in tax law may reduce any net returns for investors

The tax treatment of holders of Ordinary Shares are issued by the Company, any special purpose vehicle that the Company may establish and any company which the Company may acquire are all subject to changes in tax laws and practices in the UK or any other relevant jurisdiction. Any change may reduce any net return derived by investors from an investment in the Company.

There can be no assurance that the Company will be able to make returns for investors in a tax-efficient manner

It is intended that the Company will structure the Group, including any company or assets acquired in any Acquisition to maximise returns for investors in as fiscally efficient a manner as is practicable. The Company has made certain assumptions regarding taxation. However, if these assumptions are not borne out in practice, taxes may be imposed with respect to any of the Company's assets or the Company may be subject to tax on its income, profits, gains or distributions in a particular jurisdiction or jurisdictions in excess of taxes that were anticipated. This could alter the post-tax returns for investors (or investors in certain jurisdictions). The level of return for investors may also be adversely affected. Any change in laws or tax authority practices could also adversely affect any post-tax returns of capital to Shareholders or payments of dividends (if any, which the Company does not envisage the payment of, at least in the short to medium-term). In addition, the Company may incur costs in taking steps to mitigate any such adverse effect on the post-tax returns for investors.

Risks Relating to the Ordinary Shares

No Share Price Trading History

On Admission, there is no certainty that the Ordinary Shares will be valued at the Issue Price and it is possible that the price of the Ordinary Shares may fall on that date or on later dates.

Risk of Suspension

Should a Reverse Takeover be announced by the Company or knowledge of the same leak into the market then the Company's Ordinary Shares may be suspended. During a period of suspension shareholders may be unable to realise the value from their shares. Should the shares remain suspended of a prolonged period may be adversely affect the value of the shares.

It is the Directors' duty under the Listing Rules to contact the UKLA as early as possible if a Reverse Takeover has been agreed or is in contemplation, to discuss whether a suspension of the listing is appropriate. The UKLA retains a general power to suspend a company's securities where it considers it necessary to protect its investors. The UKLA may decide to exercise such power where the company undertakes a transaction which, because of the comparative size of the company and any target would be a Reverse Takeover under Listing Rules.

Given the size and nature of the Company it is likely that *any* Acquisition will be deemed to constitute a Reverse Takeover by reason of the application of the definition of Reverse Takeover under Chapter 5 of the Listing Rules. The Listing Rules provide generally when a Reverse Takeover is announced or leaked, there will be insufficient information in the market about the proposed transaction and the listed company will be unable to assess accurately its financial position and inform the market appropriately, so suspension of trading in the listed company's securities will often be appropriate.

Any such suspension would be likely to continue until sufficient financial information on the transaction is made public and the period during which the Ordinary Shares would be suspended may therefore be significant. Depending on the nature of the Acquisition and the stage at which it is leaked or announced it may take a substantial period in time to compile the relevant information, particularly where a target does not have financial or other information readily available which is comparable with the information a listed company would be expected to provide. A suspension of the Company's Ordinary Shares would materially reduce liquidity in such shares which may affect an investor's ability to realise some or all of his or her investment and/or the price at which such investor can effect such realisation. If the Company's listing has been suspended from trading for more than six months, the listing may be cancelled.

Generally, the Directors would expect the Company's listing to be cancelled on completion of a Reverse Takeover and should the Company's shares not be re-admitted for trading then the liquidity and price of the Company's shares could be adversely affected.

If the UKLA decided to cancel the Company's listing, the Company would expect to seek re-admission to listing at the time of completion of any such Reverse Takeover. The process for admission following a Reverse Takeover would require publication of a prospectus and it would be necessary for the Company to meet the eligibility requirements set by the UKLA in order to be admitted. However, there is a risk that such eligibility criteria might not be met and therefore there is no certainty that such re-admission would be granted. A cancellation of the listing of the Company's Ordinary Shares would materially reduce liquidity in such shares which may affect a Shareholder's ability to realise some or all of his or her investment and/or the price at which such Shareholder can effect such realisation.

The proposed Standard Listing of the Ordinary Shares will afford investors a lower level of regulatory protection than a Premium Listing

Application will be made for the Ordinary Shares to be admitted to the Standard Listing segment of the Official List. A Standard Listing will afford investors in the Company a lower level of regulatory protection than that afforded to investors in a company with a Premium Listing, which is subject to additional obligations under the Listing Rules. A Standard Listing

will not permit the Company to gain a FTSE indexation, which may have an adverse effect on the valuation of the Ordinary Shares. Further details regarding the differences in the protections afforded by a Premium Listing as against a Standard Listing are set out in the section entitled “Consequences of a Standard Listing” on page 26 of this Document.

The Company may be unable or unwilling to transition to a Premium Listing in the future

The Company is currently not eligible for a Premium Listing under Chapter 6 of the Listing Rules. There is no guarantee that the Company will ever meet this eligibility criterion or that a transition to a Premium Listing will be achieved. If the Company does not achieve a Premium Listing, the Company will not be obligated to comply with the higher standards of a corporate governance or other requirements which it would be subject to upon achieving a Premium Listing and, for as long as the Company continues to have a Standard Listing, it will be required to continue to comply with the lesser standards acceptable to a company with a Standard Listing. This would include a period of time after the Acquisition where the Company could be operating a substantial business but would not need to comply with such higher standards. In addition, an inability to achieve a Premium Listing will prohibit the Company from gaining a FTSE indexation and may have an adverse effect on the valuation of the Ordinary Shares. Further details regarding the differences in the protections afforded by the Premium Listing as against a Standard Listing are set out in the section entitled “Consequences of a Standard Listing” on page 26 of this Document.

The pre-emption rights in the Articles of the Company have been disapplied to facilitate an Acquisition and related transactions and the Company may be required to raise cash through issuing substantial additional equity to complete an Acquisition, which may dilute the percentage ownership of a Shareholder and the value of its Ordinary Shares

Although the Company will receive the Net Proceeds from the Placing and Subscription, the Directors believe that further equity capital raisings will be required by the Company in order to complete an Acquisition, which may be substantial. The pre-emption rights contained in the Articles have been disapplied in respect of the issuance of Ordinary Shares for non-cash consideration and for the issue of up to 100,000,000 shares, to facilitate the Acquisition and would dilute the value of the Ordinary Shares held by existing Shareholders, Placees and Subscribers. In addition any exercise of the Warrants and Broker Warrants will further dilute the value of the Ordinary Shares held by existing Shareholders, Placees and Subscribers.

If the Company does offer its Ordinary Shares as consideration in making an Acquisition, depending on the number of Ordinary Shares offered and the value of such Ordinary Shares at the time, the issuance of such Ordinary Shares could materially reduce the percentage ownership represented by the holders of Ordinary Shares in the Company and also dilute the value of Ordinary Shares held by such Shareholders at the time.

If a target has a large shareholder, the Company’s issue of new Ordinary Shares may result in such shareholder subsequently holding a large stake in the Company, which may, in turn, enable it to exert significant influence in the Company.

Investors may not be able to realise returns on their investment in Ordinary Shares within a period that they would consider to be reasonable.

Investments in Ordinary Shares may be relatively illiquid. There may be a limited number of Shareholders and this factor, together with the number of Ordinary Shares to be issued pursuant to the Placing and Subscription may contribute to infrequent trading in the Ordinary Shares on the London Stock Exchange and volatile Ordinary Share price movements. Investors should not expect that they will necessarily be able to realise their investment in Ordinary Shares within a period that they would regard as reasonable. Accordingly, the Ordinary Shares

may not be suitable for short-term investment. Admission should not be taken as implying that there will be an active trading market for the Ordinary Shares. Even if an active trading market develops, the market price of the Ordinary Shares may fall below the Issue Price.

Dividend payments on the Ordinary Shares are not guaranteed and the Company does not intend to pay dividends prior to an Acquisition.

The Company intends to pay dividends on the Ordinary Shares in such amounts (if any) as the Board determines appropriate and subject to its obligations under the Companies Act. Payments of such dividends will be dependent on the availability of distributable reserves. The Company can therefore give no assurance that it will be able to pay dividends going forward or as to the amount of such dividends, if any.

The ability of Overseas Shareholders to bring actions or enforce judgments against the Company or the Directors may be limited.

The ability of an Overseas Shareholder to bring an action against the Company may be limited under law. The Company is a public limited company incorporated in England and Wales. The rights of holders of Ordinary Shares which are set out in the Articles and are governed by English law. These rights may differ from the rights of Shareholders in non-UK corporations. An Overseas Shareholder may not be able to enforce a judgment against some or all of the Directors and executive officers. It may not be possible for an Overseas Shareholder to effect service of process upon the Directors and executive officers within the Overseas Shareholder's country of residence or to enforce against the Directors and executive officers judgments of courts of the Overseas Shareholder's country of residence based on civil liabilities under that country's securities laws. There can be no assurance that an Overseas Shareholder will be able to enforce any judgments in civil and commercial matters or any judgments under the securities laws of countries other than the UK against the Directors or executive officers who are residents of the UK or countries other than those in which judgment is made. In addition, English or other courts may not impose civil liability on the Directors or executive officers in any original action based solely on foreign securities laws brought against the Company or the Directors in a court of competent jurisdiction in England or other countries.

CONSEQUENCES OF A STANDARD LISTING

Application will be made for the Ordinary Shares to be admitted to the standard segment of the Official List. A Standard Listing affords Shareholders and investors in the Company a lower level of regulatory protection than that afforded to investors in companies whose securities are admitted to the premium segment of the Official List, which are subject to additional obligations under the Listing Rules.

Chapter 14 of the Listing Rules sets out the requirements for Standard Listings and does not require the Company to comply with, *inter alia*, the provisions of Chapters 6 and 8 to 13 of the Listing Rules. The Company will comply with Listing Principles 1 and 2 set out in Chapter 7 of the Listing Rules, as required by the UK Listing Authority, and intends to comply with the Premium Listing Principles as set out in Chapter 7 of the Listing Rules notwithstanding that they only apply to companies which obtain a Premium Listing on the Official List. The Company is not, however, formally subject to such Listing Principles and will not be required to comply with them by the UK Listing Authority.

1. Listing Rules which are not applicable to a Standard Listing

Such non-applicable Listing Rules include, in particular:

- Chapter 6 of the Listing Rules regarding the additional requirements for a premium listing (commercial company).
- Chapter 8 of the Listing Rules regarding the appointment of a listing sponsor to guide the Company in understanding and meeting its responsibilities under the Listing Rules in connection with certain matters. In particular, the Company is not required to appoint a sponsor in relation to the publication of this document or Admission;
- Chapter 9 of the Listing Rules relating to further issues of shares, issuing shares at a discount in excess of 10 per cent. of market value, notifications and contents of financial information;
- Chapter 10 of the Listing Rules relating to significant transactions which requires Shareholder consent for certain acquisitions;
- Chapter 11 of the Listing Rules regarding related party transactions;
- Chapter 12 of the Listing Rules regarding purchases by the Company of its Ordinary Shares; and
- Chapter 13 of the Listing Rules regarding the form and content of circulars to be sent to Shareholders.

The Company is not currently eligible for a Premium Listing under Chapter 6 of the Listing Rules and does not currently intend to seek to transfer to either a Premium Listing or other listing venue. Should the Company determine to seek a transfer to a Premium Listing there is no guarantee that it would be able to fulfil the relevant eligibility criteria.

2. Listing Rules with which the Company must comply under a Standard Listing

There are, however, a number of continuing obligations set out in Chapter 14 of the Listing Rules that will be applicable to the Company. These include requirements as to:

- the forwarding of circulars and other documentation to the UKLA for publication through the document viewing facility and related notification to a regulatory information service;
- the provision of contact details of appropriate persons nominated to act as a first point of contact with the UKLA in relation to compliance with the Listing Rules and the Disclosure Guidance and Transparency Rules;
- the form and content of temporary and definitive documents of title;
- the appointment of a registrar;
- the making of regulatory information service notifications in relation to a range of debt and equity capital issues; and
- at least 25 per cent. of the Ordinary Shares being held by the public.

In addition, as a company whose securities are admitted to trading on a regulated market, the Company will be required to comply with the Disclosure Guidance and Transparency Rules and the Market Abuse Regulations.

In due course, the Directors intend to seek to transfer from a Standard Listing to either a Premium Listing or to AIM, based on the track record of the company or business it acquires, subject to fulfilling the relevant eligibility criteria at the time.

If a transfer to a Premium Listing is possible (and there can be no guarantee that it will be) and the Company decides to transfer to a Premium Listing, the various Listing Rules highlighted above as rules with which the Company is not required to comply will become mandatory and the Company will comply with the continuing obligations contained within the Listing Rules (and the Disclosure Guidance and Transparency Rules) in the same manner as any other company with a Premium Listing.

It should be noted that the UK Listing Authority will not have the authority to (and will not) monitor the Company's compliance with any of the Listing Rules which the Company has indicated herein that it intends to comply with on a voluntary basis, nor to impose sanctions in respect of any failure by the Company so as to comply. However, the FCA would be able to impose sanctions for non-compliance where the statements regarding the compliance in this Document are themselves misleading, false or descriptive.

PART I

INFORMATION ON THE COMPANY, INVESTMENT OPPORTUNITY AND STRATEGY

Introduction

The Company was incorporated on 17 November 2016 with nominal share capital of £3 divided into 3 Founder Shares of £1 which were allotted to Andrew Morrison, Jonathan Bradley Hoare and David Little as set out in Part VI of this Document.

The Founders subscribed for £50,000 of Founder Shares at 2.5p in order to capitalise the Company and to pay for certain pre-admission costs.

On 9 May 2017, a further 24,000,000 Ordinary Shares were allotted pursuant to the Placing and Subscription conditional on Admission, at a price of 5 pence per Ordinary Share, raising £1.2m before expenses. The Placing and Subscription have not been underwritten and are subject to at least £800,000 being raised pursuant to the Placing and Subscription. The Company has received irrevocable commitments to subscribe for all of the New Ordinary Shares being issued pursuant to the Placing and Subscription.

Pursuant to the Subscription, the Founders are investing a further aggregate amount of £260,000 at the Issue Price and on the same terms as the Placees and Subscribers.

The Company has never traded and, other than in respect of the initial subscriptions referred to above, the Placing and Subscription, the proposed application for Admission and fees of £130,000 which it has committed to pay its advisers in connection with Admission, has not entered into any significant transactions or financial commitments.

The Company owns no assets other than cash on bank deposit representing sums subscribed by members for shares in the Company.

With no projects identified, the Company's expertise is weighted to satisfy its corporate finance, accounting and administrative requirements until a project is identified and acquired. On an Acquisition, management will be appointed to the enlarged group with the requisite specialist technical management expertise. During the period prior to making an Acquisition, the Company may from time to time appoint additional advisers chosen to provide technical expertise to advise on target assessment and due diligence.

In the event that the Company fails to make an Acquisition by the second anniversary of Admission the Board will consult with its shareholders as to the future direction of the Company which may include proposing de-listing the Company's shares.

Business Strategy and Execution

Background

The Company has been formed to undertake an Acquisition of a target company or business in the industrial or energy sector. The Company does not have any specific acquisitions under consideration and does not expect to engage in substantive negotiations with any target company or business until after Admission. Consideration for an Acquisition is likely to be funded through the issue of shares to raise cash and directly to the vendors of a target business.

Unless required by applicable law or other regulatory process, no Shareholder approval will be sought by the Company in relation to the Acquisition.

The Acquisition will be subject to Board approval. The determination of the Company's post-Acquisition strategy and whether any of the Directors will remain with the combined company and on what terms, will be made at or prior to the time of the Acquisition.

Potential Acquisitions

The Board believes that the Company will be attractive to a number of potential targets in the energy or industrial sectors as it will be a clean cash shell. With the experience of its Board members and advisory team it is able to offer the possibility of a faster and more certain listing process compared to a target undertaking its own efforts.

The main competition for the Company is likely to arise from potential targets undertaking their own admission process.

The Board however believes that there are several situations that will give rise to opportunities to the Company, including:

- *Overseas managed business* - good businesses led and managed overseas may not have the expertise, relevant connections or prior experience to be able to conduct their own admission process on a cost-effective basis or at all. The injection of established UK director experience could materially assist in achieving a UK listing;
- *Family managed business* - good businesses led and managed by owners who wish to create liquidity for expansion and/or progressive withdrawal from the business may offer good opportunities. These businesses may require fresh capital to invest and meet increasing technology challenges and/or to expand into new product or geographic markets. Owners may lack experience of capital markets and/or may wish to have support to reduce distraction from other business priorities;
- *Corporate Spin-out or Management Buy-out* - good businesses within major corporates can become orphaned or non-core as a by-product of larger transactions or simply as a result of changes of focus by the parent company. The parent company may not wish to have the workload or publicity associated with an independent flotation of a non-core business;
- *Company or project needing urgent seed capital* - a project that has identified substantive assets and has a strong and committed management team who need to move quickly to secure the assets and create a corporate entity around them. The capital raised by the Company could form a material contribution to the creation of value through its acquisition of the project. This could be a faster and more certain outcome for the target than undertaking its own efforts.

Strategy

The Company's strategy will be to acquire an established business or project in the energy or industrial sectors, avoiding large up-front costs and so preserving capital for operational programmes. The Company's determinations in identifying a prospective target company or acquisition in the energy or industrial sectors will not be limited to a specific geographical region, stage of development from exploration through to production or to a particular commodity. It is likely that the initial target will be a business domiciled in Europe or another OECD market but the business and/or its assets may be in another part of the world. Although the Company will seek to retain flexibility on commodity and jurisdiction of an Acquisition, its basic investment criteria will be:

- *Profit Pool Potential*: Regardless of their stage of development, potential target businesses or projects must be operating in an industry with a satisfactory profit potential. The Board will use its judgment to assess the potential for high and sustainable margins in relation to costs, for growth, for the opportunity to establish a leadership position and the overall competitive intensity. The Company will seek to avoid businesses where even good competitors earn less than the cost of capital;

- *Value Advantage:* In order to help secure a strong return on its own investment, the Company will focus on opportunities where it can offer a clear value advantage to a potential target business or project. The main sources of value advantage are expected to be the relevant experience and networks of the Directors and the ability to act quickly to complete a transaction and to deploy capital;
- *Leadership and Management:* Regardless of their stage of development, potential target businesses or projects must have a competent management team to participate fully in raising any investment funds required at re-admission and to lead the business following Acquisition. The Directors are prepared to offer such assistance as may be required to the enlarged company following Acquisition but do not seek long-term employment for themselves; and
- *Likely Market Appetite:* In consultation with the Company's stockbrokers and financial advisers, the Board will use its judgment to high-grade businesses and projects that are likely to benefit from favourable market appetite at the time of Acquisition.

Whereas size on its own is not a criterion, the Board will focus its efforts on businesses valued between £5m and £30m.

Assessment of potential targets

The Company has already started to build an inventory of opportunities in the energy and industrial sectors from which it hopes to source potential targets. Once the Company has identified a potential target, the Board will undertake a preliminary review of the opportunity using its own resources.

Where necessary for field of knowledge or other reasons, specific advice may be sought using external expertise.

The Company has to-date reviewed over 30 opportunities of which 16 are live and 7 have been through a more formal screening process. Three quarters of the live opportunities are in the energy sector and one quarter in the industrial sector, and are geographically located in the UK, the EU, the USA and Africa.

The Company does not intend to engage in substantive negotiations with any target company or business until after Admission.

If, after Admission, one or more potential targets are deemed of sufficient interest, the Board will then enter discussions pursuant to agreeing the terms of a possible transaction. Prior to entering into an Acquisition, the Board will conduct due diligence of its own and also in connection with the preparation of documentation for the readmission of the Company in connection with a required Reverse Takeover.

The Company aims to minimise the cash cost of assessing potential opportunities prior to a formal due diligence process.

Failure to make an Acquisition

If an Acquisition has not been announced by the second anniversary of Admission, the Board will consult with its Shareholders as to the future direction of the Company. This may include proposing de-listing the Company's shares and/or putting a resolution to Shareholders at a general meeting as to the on-going direction and activities of the Company. In the event that the Company is wound up, any capital available for distribution will be returned to Shareholders in accordance with the Articles. It should be noted that a special resolution of Shareholders, requiring not less than 75 per cent. of the votes cast in favour, is required to voluntarily wind-up the Company.

Use of Proceeds

The Company intends to prioritise the proceeds of the Placing and Subscription as follows:

- To pay the costs of Admission;
- To pay for the cost of due diligence associated with potential Acquisitions; and
- To pay the costs of re-admission on an Acquisition;

The Company's intention is to conserve as much as possible of its initial capital pending completion of its first Acquisition.

The operating costs of running the business prior to its first Acquisition will be kept to the minimum required commensurate with full compliance and good governance. Much of the work required for Admission has been in-sourced in order to minimise cash costs and the Directors have also agreed that no fees will be payable to them for their ordinary duties prior to an Acquisition.

Some external fees may be incurred in the process of due diligence and the Board may agree an exceptional payment to a Director under circumstances in which this saves cash that would otherwise be paid to external advisers. In the course of negotiations with a potential target, the Company may agree to fund all or part of the cash costs associated with the preparation of materials for and legal and other costs associated with a Reverse Takeover.

Under certain circumstances, where the Board considers it to be advantageous to its shareholders, the Company may agree to advance some of its initial capital to a potential target prior to the completion of an Acquisition. Such an advance may itself be considered to be a Reverse Take-Over and the costs and consequences of making any such advance will be weighed by the Board in arriving at their determination.

To the extent that the initial capital remains unused at the time of Acquisition, the Company intends to use such surplus capital to contribute to any cash consideration paid to the vendors of a target business and/or for general working capital of the enlarged business. Consideration for an Acquisition is likely to be funded through the issue of shares to raise cash and directly to the vendors of a target business.

The expected date for electronic settlement of such dealings will be 17 May 2017. All dealings between the commencement of conditional dealings and the commencement of unconditional dealings will be on a "when issued basis". If the Placing and Subscription do not become unconditional in all respects, any such dealings will be of no effect and any such dealings will be at the risk of the parties concerned.

Where applicable, definitive share certificates in respect of the Ordinary Shares to be issued pursuant to the Placing and Subscription are expected to be dispatched, by post at the risk of the recipients, to the relevant holders not later than 22 May 2017. The Ordinary Shares are in registered form and can also be held in uncertificated form. Prior to the dispatch of definitive share certificates in respect of any Ordinary Shares which are held in certificated form, transfers of those Ordinary

Shares will be certified against the register of members of the Company. No temporary documents of title will be issued.

3. Placing, Subscription and Pricing

All Ordinary Shares have been issued pursuant to the Issue Price which has been determined by the Directors. Allocations have been determined by agreement between the Company and SP Angel after indications of interest from prospective investors were received. A number of factors were considered when deciding the basis of allocations under the Placing, including the level and nature of the demand for the Ordinary Shares, investor profile and the firm through which they are made. The Company and SP Angel have ensured that the Company will have sufficient shares in public hands, as defined in the Listing Rules. The issue of the Placing Shares and Subscription Shares is conditional only on Admission.

Conditional upon Admission occurring and becoming effective by 8.00 a.m. London time on or prior to 17 May 2017 (or such later date as the Company and SP Angel may agree but by no later than 7 June 2017) each of the Placees and Subscribers agrees to become a member of the Company and agrees to subscribe for those Ordinary Shares set out in his Placing Letter or Subscription Letter. To the fullest extent permitted by law, investors will not be entitled to rescind their agreement at any time. In the event that Admission does not become effective by 8.00 a.m. London time on or prior to 17 May 2017 (or such later date as the Company and SP Angel may agree but by no later than 7 June 2017) Placees and Subscribers will receive a full refund of monies subscribed.

The rights attaching to the Placing Shares and Subscription Shares will be uniform in all respects and all of the Ordinary Shares will form a single class for all purposes.

Each of the Directors has agreed not to dispose of any interest in Ordinary Shares held by him on the date of Admission within a period of six months from Admission, save in the event of transfers for estate planning purposes, death, transfers to Directors' ISA Accounts, transfers to family trusts, transfers to personal pensions, or otherwise with the consent of the Company and SP Angel.

4. Payment

Each Placee and Subscriber has paid the Issue Price for the Placing Shares and Subscription Shares. Liability (if any) for stamp duty and stamp duty reserve tax is as described in paragraph 3 of Part IV of this Document. If Admission does not occur, Placing and Subscription monies will be returned to each Placee or Subscriber without interest.

5. CREST

CREST is a paperless settlement procedure enabling securities to be evidenced otherwise than a certificate and transferred otherwise than by written instrument. The Articles permit the holding of Ordinary Shares under the CREST system. The Company has applied for Ordinary Shares to be admitted to CREST with effect from Admission and it is expected that the Ordinary Shares will be admitted with effect from that time. Accordingly, settlement of transactions in the Ordinary Share

following Admission may take place within the CREST system if any investor so wishes. CREST is a voluntary system and Investors who wish to receive and retain certificates for their securities will be able to do so. Placees and Subscribers may elect to receive Ordinary Shares in uncertificated form if such investor is a system member (as defined in the Regulations) in relation to CREST.

6. Selling Restrictions

The Ordinary Shares will not be registered under the Securities Act or the security laws of any state or other jurisdiction of the United States and may not be taken up, offered, sold, resold, transferred, delivered or distributed, directly or indirectly, within into or in the United States.

The Placing and Subscription are being made by means of offering New Ordinary Shares to certain investors in the UK and elsewhere outside the United States in accordance with Regulations. The Company has not been and will not be registered under the US Investment Company Act, and investors will not be entitled to the benefits of that Act.

Certain restrictions that apply to the distribution of this document and the Ordinary Shares being issued pursuant to the Placing and Subscription in certain jurisdictions are described in the section headed Important Information on page 28 of this Document.

7. Transferability

The Ordinary Shares are freely transferable and tradable and there are no restrictions on transfer.

Notes to the Financial Statements

1 General information

Spinnaker Opportunities Plc (the “Company”) looks to identify potential companies, businesses or asset(s) that have operations in the industrial or energy sector. The Company is domiciled in the United Kingdom and incorporated and registered in England and Wales. The Company’s registered office is 30 Percy Street, London W1T 2DB.

The historical financial information presented herein does not constitute statutory accounts within the meaning of section 434 of the Companies Act 2006.

2 Accounting policies

The principal accounting policies applied in preparation of these consolidated financial statements are set out below. These policies have been consistently applied unless otherwise stated.

Basis of preparation

The financial information has been prepared in accordance with International Financial Reporting Standards (“IFRS”) as adopted by the European Union and in accordance with the IFRS Interpretations Committee (“IFRIC”) interpretations.

Going concern

The Company is required to assess whether it has sufficient resources to continue its operations and to meet its commitments for the foreseeable future. The directors have prepared the financial information on a going concern basis, as in their opinion the Company is able to meet its obligations as they fall due. This opinion is based on detailed forecasting for the following 12 months based on current and expected market conditions together with current performance levels. Should the going concern assumption no longer remain valid the carrying value of the Company’s assets will need to be assessed for impairment and the balance sheet will need to be prepared on a break-up basis.

Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of services in the ordinary course of the Company’s activity. Revenue is shown net of value added tax, returns, rebates and discounts. The Company recognises revenue when the amount of the revenue can be reliably measured and when it is probable that economic benefits will flow to the entity.

Financial assets

The Company classifies its financial assets in the category of loans and receivables. The classification depends on the purposes for which these assets were acquired. Management takes decisions concerning the classification of its financial assets at initial recognition and reviews such classification for appropriateness at each reporting date. Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months after the balance sheet date. These are classified as non-current assets. The Company’s loans and receivables comprise “trade and other receivables”.

2 Accounting policies (continued)

Trade and other payables

Trade and other payables are recognised and initially measured at cost, due to their short term nature. All of the Company's trade payables are non-interest bearing.

Current and deferred income tax

The tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the profit or loss, because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting date.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amount of assets and liabilities in the financial information and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction which affects neither the tax profit nor the accounting profit.

Deferred tax is calculated at the tax rates that are expected to apply to the year when the asset is realised or the liability is settled. Deferred tax is charged or credited in the profit or loss, except when it relates to items credited or charged in other comprehensive income directly to equity, in which case the deferred tax is also dealt with in other comprehensive income.

Deferred tax assets

Management regularly assesses the likelihood that deferred tax assets will be recovered from future taxable income. No deferred tax asset is recognised when management believes that it is more likely than not that a deferred asset will not be realised.

2 Accounting policies (continued)

Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount can be made. If the effect is material, provisions are determined by discounting the expected future cash flows at an appropriate pre-tax discount rate.

Equity

Share capital is determined using the nominal value of shares that have been issued.

The Share premium account includes any premiums received on the initial issuing of the share capital. Any transaction costs associated with the issuing of shares are deducted from the Share premium account, net of any related income tax benefits.

The fair value of equity-settled share-based payments is credited to a Share-based payment reserve as a component of equity until related options or warrants are exercised.

Standards issued but not yet effective

At the date of authorisation of these financial statements, the following standards and interpretations relevant to the Company and which have not been applied in these financial statements, were in issue but were not yet effective. In some cases these standards and guidance have not been endorsed for use in the European Union.

Standards issued not effective at 31 March 2017

	Effective for periods beginning on or after
IFRS 2 (amendments) Classification and Measurement of Share-based Payment Transactions	1 January 2018*
IFRS 9 Financial Instruments	1 January 2018

IFRS 16 Leases	1 January 2019*

IAS 40 Transfers of Investment Property	1 January 2018*
IFRIC 22 Foreign Currency Transactions and Advance Consideration	1 January 2018*
Annual Improvements to IFRSs: 2014-2016 cycle	1 January 2017*

* Not yet endorsed for use in the EU.

The directors are evaluating the impact that these standards will have on the financial statements of the Company.

2. Critical accounting estimates and judgements

In application of the Company's accounting policies, which are described in note 2, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying the Company's accounting policies

There are no critical judgements that the directors have made in the process of applying the Company's accounting policies and that have a significant effect on the amounts recognised in the financial statements.

Key sources of estimation uncertainty

There are no key assumptions concerning the future, or other key sources of estimation uncertainty at the balance sheet date, that may have a significant risk of causing material adjustment to the carrying amounts of assets and liabilities within the next financial year.

The Company's financial instruments comprise cash and cash equivalents of £35,003 and trade payables of £12,500 which arise directly from its operations. It is, and has been throughout the period under

Liquidity Risk

The Company has to date financed its operations from cash reserves funded from share issues, Management's objectives are now to manage liquid assets in the short term through closely monitoring costs and raising funds through the issue of shares.

The Company has no borrowing facilities that require repayment and therefore has no interest rate risk exposure.

Values of Financial Assets and Liabilities

The Directors consider that the fair value of the Company's financial assets and liabilities are not considered to be materially different from their book values.

12 Post balance sheet events

On 9 May 2017, pursuant to the Placing and Subscription, 24,000,000 Ordinary Shares were issued, conditional on Admission, at 5 pence per share and the Company committed to pay further fees to the Company's advisers in relation to Admission of £117,500.

Capital Resources

The Company's initial source of cash will be the Net Proceeds of the Placing and Subscription, which are, in aggregate, expected to be £1.07m. The Net Proceeds will be held in an interest bearing account and will be used for general business purposes, including paying the expenses of Admission and the Company's ongoing costs and expenses, including due diligence costs and other costs of sourcing, reviewing and pursuing Acquisitions.

The Directors have agreed that in order to preserve the Company's capital, no fees will be payable to them for their ordinary duties prior to completing an Acquisition. Directors will be permitted to claim reimbursement from the Company for reasonable expenses incurred in connection with the business and the Board may use its discretion to make a payment to a Director in the event that s/he performs duties that are extraordinary, for example if significant time is spent in the completion of due diligence thereby saving professional fees that might otherwise be incurred.

The Company intends to use the Net Proceeds to finance due diligence on potential acquisitions and for general working capital. It is intended that the initial Acquisition will be paid for using new Ordinary Shares either solely or in conjunction with cash, should the Board consider it appropriate.

The Board considers that the Net Proceeds should be sufficient to cover both the expenses and any other costs associated with an Acquisition. Consideration for an Acquisition is likely to be funded through the issue of shares to raise cash and directly to the vendors of a target business.

PART IV

TAXATION

The following statements are intended only as a general guide to current UK tax legislation and to the current practice of HMRC and may not apply to certain Shareholders in the Company, such as dealers in securities, insurance companies and collective investment schemes, or Shareholders whose opportunity to acquire shares arose from their or another's employment. They relate (except where stated otherwise) to persons who are resident and, in the case of individuals, domiciled in the UK for UK tax purposes, who are beneficial owners of New Ordinary Shares and who hold their New Ordinary Shares as an investment. Any person who is in any doubt as to his or her tax position, or who is subject to taxation in any jurisdiction other than that of the UK, should consult his or her professional advisers immediately.

1. Dividends

a. *Withholding at source*

The Company will not be required to withhold at source on account of UK tax when paying a dividend.

b. *Individual Shareholders*

From 6 April 2016 dividends paid by a UK company no longer carry a tax credit. An individual Shareholder who is resident in the UK (for UK tax purposes) and who receives a dividend from the Company and is liable to income tax only at the basic rate will be subject to tax on the dividend at the rate of 7.5 per cent. of the dividend received. An individual Shareholder who is liable to income tax at the higher rate will be liable to tax on the dividend received at the rate of 32.5 per cent. An individual Shareholder who is liable to tax at the additional rate will be liable to tax on the dividend received at the rate of 38.1 per cent. The dividend will be regarded as the top slice of the Shareholder's income. Individuals may be entitled to an annual tax-free "dividend allowance" of £5,000. Depending on a Shareholder's personal circumstances, and to the extent it is not used against other income, the general income tax personal allowance (£11,000 for the 2016/17 tax year) may also be available to set against any dividend income from Ordinary Shares (in addition to the new "dividend allowance").

For Trustees the rate of income tax on dividends is 38.1 per cent. where total trust income exceeds £1,000.

Individual Shareholders who are not a resident in the UK for tax purposes should consult their own advisers concerning their tax liabilities on dividends received.

a. *Other Shareholders*

Shareholders who are within the charge to UK corporation tax will be subject to corporation tax on dividends paid by the Company, unless the dividends fall within an exempt class and certain other conditions are met. Whether an exempt class applies and whether the other conditions are met will depend on the circumstances of the particular Shareholder, although it is expected that the dividends

paid by the Company would normally be exempt. UK pension funds and charities are generally exempt from tax on dividends which they receive.

2. Chargeable Gains

For the purpose of UK tax on chargeable gains, the amounts paid by a Shareholder for New Ordinary Shares will generally constitute the base cost of his or her holding of New Ordinary Shares. If a Shareholder who is resident in the UK (for UK tax purposes) disposes of all or some of his or her New Ordinary Shares, a liability to tax on chargeable gains may arise. This will depend on the base cost which can be allocated against the proceeds, the Shareholder's circumstances and any reliefs to which they are entitled. In the case of corporate Shareholders, indexation allowance may apply to any amount paid for the New Ordinary Shares.

If a Shareholder who is a UK resident individual disposes of all or some of their Ordinary Shares, a liability to tax on capital gains made from the disposal may arise. The extent of the tax liability will depend on the availability to the Shareholder of the CGT annual exemption (£11,100 for the 2016/17 tax year), to the extent this has not been used against other gains, and any other tax reliefs available such as existing capital losses. The current rate of capital gains tax for individuals liable to income tax at the higher or additional rate is 20 per cent. Individuals whose taxable income for the year in question is less than the upper limit of the basic rate income tax band (£32,000 for 2016/17) are subject to capital gains tax at the rate of 10 per cent, except to the extent that the aggregate of their total taxable income and chargeable gains (less allowable deductions) in that year exceeds the upper limit of the basic rate income tax band. Any such excess over the upper limit is subject to tax at the rate of 20 per cent.

Trustees of a UK resident trust will also be subject to CGT on any capital gains from disposals of Ordinary Shares. Any gain may be capable of mitigation by use of the annual exemption available to the trustees (£5,550 for the 2016/17 tax year), to the extent this has not been used against other gains, and any other tax reliefs available such as existing capital losses. For trustees and personal representatives, the rate of capital gains tax is 20 per cent.

Shareholders that are UK tax resident companies and hold Ordinary Shares as an investment will be subject to corporation tax on any capital gain arising, subject to mitigation by the indexation allowance and potentially by any losses available to the company. Corporate Shareholders are liable to tax on capital gains at the prevailing rate of corporation tax (currently up to 20 per cent). In certain circumstances a corporate Shareholder may qualify for the substantial shareholding exemption, which exempts certain gains from corporation tax on chargeable gains.

Shareholders who are not resident in the UK for tax purposes may not, depending on their personal circumstances, be liable to UK taxation on chargeable gains arising from the sale or other disposal of their New Ordinary Shares (unless they carry on a trade, profession or vocation in the UK through a branch or agency or, in case of a company, a permanent establishment with which their New Ordinary Shares are connected).

Individual Shareholders or holders who are temporarily non-UK resident may be liable to UK capital gains tax on chargeable gains realised during their period of non-residence on their return to the UK.

3. Stamp Duty and Stamp Duty Reserve Tax (“SDRT”)

The Statements below are intended as a general guide to the current position. They do not apply to certain intermediaries who are not liable to stamp duty or SDRT, or to persons connected with depository arrangements or clearance services, who may be liable at a higher rate.

In relation to stamp duty and SDRT:

- i. The allocation and issue of the New Ordinary Shares will not give rise to a liability to stamp duty or SDRT.
- ii. Any subsequent conveyance or transfer on sale of shares or will usually be subject to stamp duty on the instrument of transfer at a rate of 0.5 per cent. of the amount or value of the consideration (rounded up, if necessary, to the nearest £5). An exemption from stamp duty is available on an instrument transferring shares where the amount or value of the consideration £1,000 or less and it is certified on the instrument that the transaction effected by the instrument does not form part of a larger transaction or series of transactions in respect of which the aggregate amount or value of the transaction exceeds £1,000. A charge to SDRT at the rate of 0.5 per cent will arise in relation to an unconditional agreement to transfer such shares. However, where within six years of the date of the agreement (or, if the agreement was conditional, the date the agreement became unconditional) an instrument of transfer is executed pursuant to the agreement and stamp duty is paid on that instrument, any liability to SDRT will be cancelled or repaid.
- iii. A transfer of shares effected on a paperless basis through CREST (where there is a change in the beneficial ownership of shares) will generally be subject to SDRT at the rate of 0.5 per cent of the value of the consideration given.

The above statements are intended as a general guide to the current position. Certain categories of persons are not liable to stamp duty or SDRT, and others may be liable at a higher rate or may, although not primarily liable for the tax, be required to notify and account for it under the Stamp Duty Reserve Tax Regulations 1986, as amended.

An offer under Rule 9 must be in cash and at the highest price paid within the preceding twelve months for any shares in the Company by the person required to make the offer or any person acting in concert with him.

Rule 9 of the City Code also provides that where any person together with persons acting in concert with him is interested in shares carrying more than 30 per cent but does not hold shares carrying more than 50 per cent of the voting rights and such person, or any person acting in concert with him, acquires any additional shares, such person is required to make a general offer to the shareholders of that company.

5. Memorandum of Association

The provisions contained in the Company's Memorandum of Association determining its objects state that the Company's main activity is that of a general commercial company.

6. Articles of Association

The Articles of Association of the Company, contain, inter alia, the following provisions relating to the rights attaching to Ordinary Shares

- (a) There are no rights of pre-emption in respect of transfers of issued Ordinary Shares. However, in certain circumstances, the Company's Shareholders may have statutory pre-emption rights under the Act in respect of the allotment of new shares in the Company. These statutory pre-emption rights would require the Company to place new shares for allotment of existing Shareholders on a pro-rata basis before allotting them to other persons. In such circumstances, the procedure for the exercise of such statutory pre-emption rights would be set out in the documentation by which such shares are offered to the Company's Shareholders.
- (b) In order to transfer Ordinary Shares, the instrument of transfer of any such shares must be in any usual or common form or in such other form as may be approved by the Directors and must be executed by or on behalf of the transferor and, if the shares are not fully paid, by or on behalf of the transferee. The Articles of Association contain no restrictions on the free transferability of fully paid shares, provided that the transfer is in respect of only one class of share and is accompanied by the share certificate and any other evidence of title required by the Directors and that the provisions in the Articles of Association relating to the deposit of instruments for transfer have been complied with;
- (c) Each Ordinary Share confers the rights to receive notice of and attend all meetings of shareholders. Each holder of Ordinary Shares present at a general meeting in person or by proxy has one vote, and, on a poll, one vote for each Ordinary Share of which he is the holder;
- (d) On a winding up a liquidator may, with the sanction of a special resolution of the Company, divide amongst the holders of the Company's shares (in specie or in kind) the whole or any part of the assets of the Company, and may, with the like sanction, determine how such diversion is to be carried out.
- (e) The Ordinary Shares confer upon their holders the right to participate in any profits which the Company may from time to time determine to distribute in respect of any financial period;
- (f) Subject to the provisions of the Act and if the profits of the Company justify such payments, the Directors may declare and pay interim dividends on shares of any class of such amounts as and when they think fit. All dividends are apportioned and paid pro-rata according to the amounts paid on the shares. No dividend or other monies payable on or in respect of a share will bear interest as against the Company. The Directors may retain any dividend or other monies payable on or in respect of a share on which the Company has a lien, and may apply them towards the satisfaction of the debts, liability or engagements in respect of a lien. A dividend may be retained if a shareholder has failed to comply with the statutory disclosure requirements of the Act. Any dividend unclaimed for twelve years will be forfeited and revert to the Company;

- (g) Subject to the provisions of the Act, the Company may purchase any of its own shares, provided that the terms of any contract under which the Company will or may become entitled or obliged to purchase its own shares be authorised by a special resolution of the Company in a General Meeting before the Company enters into such a contract;
- (h) All or any of the rights or privileges attached to any class of shares in the Company may be varied or abrogated with the consent in writing of the holders of three-fourths in nominal value of the issued shares of that class or with the sanction of an extraordinary resolution passed at a separate general meeting of the holders of shares of that class. At every such separate general meeting the quorum is two persons holding or representing by proxy one-third in nominal value of the issued shares of that class; and
- (i) The Company may make arrangements for any class of its shares to be issued in uncertificated form and in accordance with and subject as provided in The Uncertificated Securities Regulations 2001 and transfer of title of those shares shall be effected by means of relevant system in the manner provided for and subject as provided for in Uncertificated Securities Regulations 2001. The Retained Advisers will provide advisory services to the Board of Directors of the Company on a part-time basis at the request of the Board.

The Company and the Directors have given certain warranties as to the accuracy of the information contained in this document and other matters in relation to the Company, and the Company has given certain customary indemnities to SP Angel. SP Angel may terminate the Placing Agreement in certain specified circumstances prior to Admission, principally in the event of a material breach of the Placing Agreement or any of the warranties contained in it or any failure by the Directors or the Company to comply with their obligations which is or will be in the opinion of SP Angel, materially prejudicial in the context of the Placing.
